Public safety | Software engineering | Artificial Intelligence | Research and teaching

São Paulo, Brazil | murilow@gmail.com | [linkedin.com/in/murilogoies](https://www.linkedin.com/in/murilogoies) | murilogoies.github.io

PROFESSIONAL SUMMARY

Captain in the São Paulo State Military Police, researcher and technology professional, with a public safety career since 2007 and professional information technology experience since 2014. Background in technical leadership, police intelligence, software architecture, data integration, cyber intelligence and mission-critical systems at state and national scale. PhD candidate in Computer Science researching Artificial Intelligence, Natural Language Processing and public safety applications.

CORE EXPERTISE

- Software architecture and distributed systems	- AI, Machine Learning, NLP and text mining
- Data integration, APIs and microservices	- Information security and cyber intelligence
- Technical leadership and team management	- Public-sector digital transformation

PROFESSIONAL EXPERIENCE

Captain Head of Systems Development - Intelligence Center <i>São Paulo State Military Police</i> - Leads the development and evolution of information systems for police intelligence. - Defines architectures and integrations across mission-critical public safety data platforms. - Guides technical teams and translates operational needs into secure, sustainable solutions.	2017 - present
Full Stack Developer and Technical Advisor <i>Brazilian Ministry of Justice and Public Safety - intergovernmental assignment</i> - Worked with the Innovation and Technology Coordination of the Department of Operations and Intelligence. - Developed and managed national platforms including Córtex, ORCRIM and the Cronos Network. - Advised strategic decision-makers on emerging technologies, cyber intelligence and AI-based initiatives.	2019 - 2024
Lieutenant Head of Databases and Systems Architecture <i>São Paulo State Military Police - central IT department</i> - Coordinated database administration, architecture, systems integration and web services. - Supported data modeling, migration and information extraction for institutional systems.	2014 - 2017
Lieutenant Police Patrol Commander <i>São Paulo State Military Police</i> - Supervised patrol teams and field operations, including high-risk incidents. - Developed leadership, decision-making and resilience in high-pressure environments.	2007 - 2014

EDUCATION

PhD in Computer Science | São Paulo State University - UNESP | 2023 - present

Research in AI, NLP and contextual classification of homicide records.

Visiting Researcher | University of Sheffield, United Kingdom | 2024 - 2025

Academic research in Machine Learning and Natural Language Processing.

Professional Master's in Applied Computing | University of Brasília - UnB | 2020 - 2022

Software Engineering. Honorable Mention in the 2024 UnB Master's Thesis Prize.

Postgraduate Certificate in Distance Education Management | Fluminense Federal University - UFF | 2015 - 2017

Degree in Systems Analysis and Development | Federal Institute of São Paulo - IFSP | 2015 - 2018

Bachelor of Laws | Cruzeiro do Sul University - UNICSUL | 2011 - 2012

Bachelor's in Police Sciences in Security and Public Order | Barro Branco Military Police Academy | 2007 - 2010

Technical Diploma in Data Processing | UNESP Industrial Technical College - Bauru | 2002 - 2004

SELECTED PUBLICATIONS

- Authentication and Authorization in Microservices Architecture: A Systematic Literature Review. Applied Sciences, 2022.
- A Digital Signature Model Using XAdES Standard as a REST Service. Information, 2021.
- The Adoption of Microservices Architecture as a Natural Consequence of Legacy System Migration at Police Intelligence Department. Springer, ICCSA 2022.
- Machine Learning for Homicide Classification in São Paulo State. IADIS, 2022.

TEACHING AND KNOWLEDGE EXCHANGE

Instructor in cyber intelligence and information security for public-sector professionals. Author of classes and learning materials on Artificial Intelligence, machine learning, ethics, data protection and governance.

TECHNOLOGIES AND METHODS

Python, Java, JavaScript, C#, Angular, Spring, REST APIs, microservices, containers, SQL Server, MySQL, NoSQL, OAuth 2.0, OpenID Connect, Linux, Machine Learning, NLP, data engineering, Power BI, Scrum and information security.
